

EGE INSTITUTIONAL RESEARCH REPORT

RESEARCH UPDATE

MARCH 18, 2008

EMERGING GROWTH EQUITIES, LTD.

PARKERVISION, INC.

NASDAQ: PRKR - \$7.99

Semiconductors – Integrated Circuits

PRKR Reports 4Q:07 Results; We Expect New Deal Momentum To Build In 2008; Maintain STRONG BUY Rating

Recent Sell-Off Creates Buying Opportunity, In Our View. We expect PRKR's fundamentals to strengthen in 2008 with two to three more deals signed this year. In addition, we believe that product development with its two existing customers is on track. PRKR's unique technologies process the RF waveform in a more optimal manner than existing technologies, allowing OEMs to create handsets that have extended battery life, more easily incorporate multiple air interface standards and frequencies in smaller form factors, and reduce manufacturing costs. PRKR's current prototypes support multi-band and multi-mode functionality. The Company's ICs support the current and emerging cellular standards including GSM/EDGE, CDMA, W-CDMA, HSPA, and WiMax. The benefits of PRKR's technology becomes more pronounced with 3G phones and beyond. Industry estimates predict about 500 million 3G phones will be sold in 2009 providing a considerable market opportunity for PRKR, in our opinion.

4Q:07 Results. In the fourth quarter, PRKR reported no revenue and a net loss of \$0.19 per share compared with a net loss of \$0.14 per share the previous year. The decrease was primarily the result of increased operating costs related to personnel and engineering as the Company increased its efforts to commercialize its technology. While PRKR doesn't expect much, if any, engineering and services fees from ITT Corp (NYSE: ITT) in 2008, we continue to believe that ITT's engineers simply do not need the additional product development help. It is also our belief that PRKR will see some royalty revenue in 4Q:08, but we still expect a meaningful ramp to begin in 1Q:09. Also, on March 5th, 2008, PRKR announced a private placement of 1.24 million shares of common stock resulting in about \$9 million in net proceeds. This brings the Company's cash balance to approximately \$22.4 million, which should fund operations for the next four to five quarters.

Maintain STRONG BUY. PRKR confirmed that its relationship with ITT is intact and that it expects to ship volume ready silicon to its chipset customer in 4Q:08. We expect a considerable increase in sales in 2009 that should become more evident as new design wins are announced this year. We also think PRKR may be tempering expectations a bit in order to have room for some positive announcements. In addition, the Company plans to update its website in the next few days, which should help demonstrate how its technology works and why top-tier handset OEMs want to use it. Our valuation is based on a multiple of 18x our new 2009 EPS estimate of \$1.93 (from \$1.91), discounted back to 2008 at 30%, resulting in a price target of about \$27. (See discussion of Investment Risks on page 2.)

CORPORATE OVERVIEW

PRKR is a fabless semiconductor Company that is focusing on the commercialization of its patented proprietary RF (radio frequency) communication technologies. The Company has developed its ESP (energy signal processing) technology into its two primary solutions, Direct2RFPower (d2p) and Direct2Data (d2d). These two offerings will target the mobile handset market addressing the needs for extended battery life, reduced handset cost, and better performance as the cellular industry migrates to 3G networks. PRKR has obtained 59 U.S and 54 foreign patents, and 98 pending. The Company's business strategy includes forming relationships with OEMs (original equipment manufacturers) and ODMs (original design manufacturers) for incorporation of the Company's integrated circuits into products manufactured by others or to license its technology for use by others. PRKR has approximately 55 employees at its headquarters in Jacksonville, Florida with additional facilities in Orlando, Florida.

INVESTMENT RISKS

Disruptive Technology: The technology PRKR has developed can be classified as a disruptive technology since it is a complete and radical shift from traditional RF technology utilized today. There is no assurance this technology will gain market acceptance. A particular challenge is that OEM/ODMs may not be willing to take on the risk associated with bringing a new unproven technology to market or they may find incorporating the technology into existing products is too cumbersome.

Business Model Execution: PRKR success rests solely on its ability to penetrate the mobile handset market by licensing and selling its d2p and d2d technology to OEM/ODMs. Failure to execute this plan could have an adverse effect on future revenues as well as the long term viability of the Company.

Customer Conversion and Base: Currently PRKR has no customers and no sources of revenue. The Company is in the process of attracting OEM/ODMs to either purchase or license its technology. There is no guarantee that its marketing efforts will attract customers. Additionally, if and when the Company signs its first customers, revenue is likely to be concentrated around a few large customers.

Competitive Products: The microelectronics industry is highly competitive ranging from established players to smaller start-ups. To succeed, substantial capital must continually be invested in R&D to ensure new and more innovative products are developed. Although PRKR has developed a new RF technology there are current products on the market that address similar needs without assuming the risks of implementing a completely new technology.

Intellectual Property: PRKR sustainable competitive advantage hinges on its patent portfolio of new technologies. There is no guarantee that the Company's existing patents are broad enough to fully protect its newly developed technology.

Revenue Recognition: It is still unclear whether the Company will sell its technology via licensing, direct sales, or a combination of both models. This translates into many unknowns as to how and when revenue will be booked. An OEM contract signing under a sales model may not produce revenue for one year after the signing date, while a license sale could result in immediate upfront revenue.

ANALYST CERTIFICATION

I, Michael C. Donahue, certify that the views expressed in this research report accurately reflect my personal views about the subject securities and issuers. In addition, no part of my compensation was, is, or will be directly or indirectly related to this recommendation or views contained in this report.

DISCLOSURES

The following conflicts of interest exist with Emerging Growth Equities' ("EGE", or the "Firm") recommendation of the securities of the issuer (the "Company") that is the subject of this report:

1. EGE makes a market in the securities issued by the Company.
2. EGE is engaged in the investment banking business and seeks investment banking assignments from a wide range of companies, including those on which the Firm provides research recommendations. Therefore, investors should assume that EGE intends to seek compensation for investment banking services within the next three months, and thereafter, from this Company.
3. EGE's policy is that analysts do not own securities issued by the companies they cover. The Firm's analysts are compensated like other employees of EGE, based upon the Firm's overall revenue generation, which includes revenues from institutional sales, trading and investment banking departments, as well as on various other activities performed by the Firm's analysts that are intended assist the Firm's institutional clients.
4. EGE and/or its affiliates and employees may own securities issued by this Company.

EGE RESEARCH RATING DEFINITIONS

Strong Buy	Subject security could significantly outperform its peer group, driven by potential near-term catalyst(s). Advise clients to aggressively establish new positions.
Buy	Subject security could outperform its peer group. Advise clients to patiently establish new positions.
Hold	Subject security likely to perform in line with its peer group, with little or no appreciation expected. Advise clients against establishing new positions.
Sell	Subject security is expected to underperform its peer group. Advise clients to reduce positions.
No Rating	No formal rating has been issued, or rating has been suspended.
Monitor	No rating has been issued, or rating has been suspended, and we are following the company's progress.
